

IN THE CLAIMS:

1. (Currently Amended) A wound adhesive tape comprising a substantially flat ring body made of a sheet material having a thickness of 10  $\mu\text{m}$  to ~~100  $\mu\text{m}$~~  70  $\mu\text{m}$ , and an adhesive tape wound around the outer peripheral surface of said substantially flat ring body with an adhesive surface facing inward toward the ring body, and wherein the substantially flat ring body has printing on the inner peripheral surface thereof.

2. (Previously Presented) A wound adhesive tape as claimed in claim 1, wherein the sheet material is a material selected from the group consisting of a paper sheet, a plastic film, and a metal foil.

3. (Cancelled)

4. (Currently Amended) A wound adhesive tape comprising a substantially flat ring body made of a sheet material having a thickness of 10  $\mu\text{m}$  to ~~100  $\mu\text{m}$~~  70  $\mu\text{m}$ , said material being flexible and readily deformable, and an adhesive tape wound around the outer peripheral surface of said substantially flat ring body with an adhesive surface facing inward toward the ring body, and wherein the substantially flat ring body has printing on the inner peripheral surface thereof.

5-6. (Cancelled)
